Subject: RE: Champion Modification

Hi Allen-

I have reviewed Altamont Environmental's Permit Modification in the correspondence dated May 12, 2011 (DOC ID # 13896) with clarifications in the letter dated June 21, 2011 (DOC ID# 14220) with regard to landfill gas monitoring at the proposed expansion of post-closure uses at the existing International Paper Sports Complex located in the Landfill 5B Area. Due to the position of the new concession stand and restroom building proposed at the "East Fields" area located off to the side of covered waste, quarterly ambient air sampling of this new building is acceptable as proposed. The existing compliance landfill gas monitoring wells must continue to be sampled quarterly and the continuous landfill gas monitoring detector with the existing maintenance building must also continue to operate 24 hours a day. Please let me know if you have any further questions.

Christine Ritter

Subject: Champion Modification

Hey Christine,

Were you waiting to hear back from me regarding my conversation with Andrea concerning LFG monitoring at the closed Champion-International Landfill? I have spoken with her and she is fine with your decision regarding LFG and the proposed changes at the landfill. If you could shoot me an email, per our conversation, regarding LFG monitoring as it relates to the proposed changes I would greatly appreciate it.

Thanks,
Allen
