Re: Groundwater Assessment Monitoring Plan Approval
Haywood County Closed Landfill – Francis Farm
Haywood County
Permit No. 44-03
Doc ID No. 9781

Dear Mr. Cotton:

The Solid Waste Section (Section) has reviewed the *Groundwater Assessment Monitoring Plan* (Doc ID #9358) submitted on your behalf by McGill Associates and Bunnell-Lammons Engineering, Inc. on December 30, 2009. The Section approves this plan. However, please note the following stipulations.

1. The newly installed monitoring wells (MW-6, MW-7, MW-8, MW-9, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15) will need to have a baseline sampling event as required under 15A NCAC 13B .1634
2. This baseline sampling event may take place during the next scheduled semi-annual sampling event after the installation of the new wells. Ideally, the installation of the new wells would occur within a couple of weeks prior to a scheduled semi-annual monitoring event.
3. Submit boring logs and well installation records for the new monitoring wells.
4. Notify the Section when negotiations between Haywood County and the adjacent land owners providing access to their private property are finalized.
5. Submit a milestone schedule within sixty (60) days after receipt of this letter.

Thank you for your efforts and cooperation on this matter. If you have questions or concerns, please contact me via email Elizabeth.werner@ncdenr.gov or phone at (919) 508-8496.

Sincerely,

Elizabeth S. Werner
Hydrogeologist
