Mr. Stephen King
Haywood County Solid Waste Director
278 Recycle Road
Clyde, North Carolina 28721

Subject: LFG Project – Generator Approval
Francis Farm MSW Landfill
Haywood County, Permit #44-03, Document ID No. 13503

Mr. King:

The Division of Waste Management, Solid Waste Section (Section) has reviewed the document requesting the addition of a generator set(s) as part of the landfill gas collection and combustion system (DIN 13438). This document was submitted on your behalf by McGill Associates and was received in the Asheville Regional Office on March 24, 2011.

Based on this review, the Section approves the addition of a generator set(s) to the proposed landfill gas collection and combustion system. In addition, the Section is willing to allow the system to operate, for tuning purposes only, after conformance testing and while reviewing the completion report as long as all safety mechanisms and procedures are in place and functional. It should be noted, the Section may require shutdown of the system if any of the required submittals are found to be inadequate. As a reminder, any significant deviations from the plan must be approved by the Section and require submission of as built drawings. Also, the previously stated (DIN 9476) completion report and requirements for the Permit to Operate modification must be submitted and approved by the Section prior to permanent operation of the system.

If you should have any questions regarding this matter please contact me at (828) 296-4703, or by email at allen.gaither@ncmail.net.

Sincerely,

Allen Gaither
Environmental Engineer
