

North Carolina Department of Environment and Natural Resources

Dexter R. Matthews, Director

Division of Waste Management

Michael F. Easley, Governor
William G. Ross Jr., Secretary

SOLID WASTE SECTION

January 7, 2008

Mr. David Lambert
Iredell County – Director of Solid Waste
354 Twin Oaks Road
Statesville, North Carolina 28677

Subject: Construction & Demolition Debris Unit Closure
Iredell County Landfill
Iredell County, Permit #49-03, Document ID No. 6531

Mr. Lambert:

This letter is being written to remind you of the regulatory requirements for closure of existing C&DLF units which stopped receiving waste as of June 30, 2008. You notified the Section of your intent to close by letter on May 5, 2008 (Document ID No. 4871). Therefore, the facility should have been closed in accordance with 15A NCAC 13B.0505. These rules specifically require the area to be stabilized with native grasses within six months after final termination of disposal operations. If closure of the facility is not complete, or the area has not been stabilized with native grasses, you will need to submit a written request for an extension. Included in this request must be a revised schedule of all closure activities yet to be completed. If required, please submit the extension request and revised schedule of closure activities no later than February 6, 2009.

In addition, at the end of closure activities, the requirements of 15A NCAC 13B.0510(a) must be met. These requirements state you must notify the Division in writing that the disposal site has been closed in accordance with the Rule .0505. A site inspection by the Section is also a requirement. During this inspection you must provide test holes for the Section representative to determine compliance of the final cover. Once closure is complete, please notify and arrange the site inspection with C.T. Gerstell in the Field Operations Branch.

If you should have any questions regarding this matter please contact me at (828) 296-4703, or by email at allen.gaither@ncmail.net.

Sincerely,

Allen Gaither
Environmental Engineer
