Ethan,

I am reviewing the Assessment of Corrective Measures (ACM) for City of Albemarle Permit No. 84-01, you submitted on September 18, 2007.

I have just a few questions and modification requests to the Report.

Page 20, Section 4.1 Conclusions, states in-part: "*Remediation alternatives are shown on Table 20.*"  
Please modify this statement to read Table 19, instead of Table 20.

I could not locate or overlooked in the Report "Historical Surface Water Results VOCs/SVOCs", which is required under Table 11 (Historical Surface Water Results VOCs/SVOCs) of the "The NC Solid Waste Section Guidelines for Corrective Action At Solid Waste Management Facilities".

Please submit this requirement.

For reference, the guidance link is :

<http://www.wastenotnc.org/swhome/EnvMonitoring/SWCorrectiveMeasuresGuidance.pdf>

\*Figures 5,6,10,11,12, and 13 of the Report depict averages for groundwater elevation, total VOCs', and historical VOC trends. The NC Solid Waste Section Guidelines for Corrective Action At Solid Waste Management Facilities require that "shallow" and "deep" criteria be shown.

\*Note: this information does not necessarily have to included in the ACM, but will need to be included the CAP.

Thank you,

Brian
