Dudley, North Carolina 28333-5321

Subject: Final Corrective Action Plan
Wayne County Landfill
Construction and Demolition Landfill, Permit 96-01
Doc ID 7883

Dear Mr. Rogers:

Municipal Engineering Services Company, P. A. (MESCO) contacted the Solid Waste Section (SWS) on June 26, 2009 to request more time to complete the final Corrective Action Plan (CAP) referenced in the SWS letter, dated June 12, 2009 (Doc ID 7551). Numerous issues are addressed in prior SWS correspondence (Doc ID's 7277 and 7551). Foremost issues are: (1) abandonment of the onsite well identified in MESCO's reports; (2) defining the contamination plume with field data; and (3) submitting financial assurance for corrective action. MESCO requested more time to acquire the field data.

The CAP is required pursuant to 15A NCAC 13B .0547(4)(c), effective July 1, 2008. **August 15, 2009 is the deadline for the final CAP. If a CAP is not received then, enforcement action may be initiated.** Pursuant to North Carolina General Statute 130A-22, an administrative penalty up to \$15,000 per day may be assessed for each violation of Regulations 15A NCAC 13B .1636-.1637 and 0.0547.

If you have questions, please contact me at 919-508-8401 or at: zinith.barbee@ncdenr.gov.

Sincerely,

Zinith Barbee
Project Manager
Solid Waste Section
