Re: Swift Creek Dewatering Analysis  
Swift Creek Project Highway 301  
Battleboro, Nash County

Dear Mr. Carroll and Mr. Waldrop:

The Solid Waste Section has reviewed the *Swift Creek Dewatering Analysis* submitted on December 15, 2006 on behalf of ReUse Technology Inc. by Appian Consulting Engineers, PA. for the Swift Creek Project Highway 301 located in Nash County. The *Swift Creek Dewatering Analysis* was submitted pursuant to a Compliance Order With Administrative Penalty issued by the Division of Waste Management, Solid Waste Section to ReUse Technology, Inc. on September 15, 2006.

Pursuant to the Compliance Order, "In the event that the facility fails to perform satisfactorily, including the creation of nuisance and conditions, ReUse Technology shall take such immediate corrective action as may be required by the Solid Waste Management Section including the construction of additional or replacement waste water treatment or disposal facilities. This plan must include a description of actions that Full Circle Solutions, Inc. intends to take that will result in the removal of the water in the coal ash fill area and establish the (one-foot) separation between the base of the CCB's in the coal ash fill area and the groundwater under the coal ash fill area."

The *Swift Creek Dewatering Analysis* is conditionally approved based on the performance of the above plan. If the dewatering of the ash and the one foot separation has not been accomplished within the proposed timeframe (i.e. one year, page 5), the Division may require additional corrective measures to be implemented. Please submit a detailed plan within 60 days that demonstrates how the effectiveness of the dewatering plan will be monitored.

Please call me at 919-508-8500 if you have any questions or concerns regarding this correspondence. Thank you for your continued cooperation in this matter.

Sincerely,

Jaclynne Drummond  
Hydrogeologist  
Environmental Compliance
