Re: Swift Creek Monitoring Plan for the Dewatering Program
Swift Creek Project Highway 301
Battleboro, Nash County

Dear Mr. Carroll and Mr. Waldrop:

The Solid Waste Section has reviewed the *September 11, 2007 Swift Creek Monitoring Plan – Dewatering Program* submitted on behalf of ReUse Technology Inc. by Sherrill Environmental, Inc. for the Swift Creek Project Highway 301 located in Nash County. The *Swift Creek Monitoring Plan – Dewatering Program* was submitted pursuant to a Compliance Order With Administrative Penalty issued by the Division of Waste Management, Solid Waste Section to ReUse Technology, Inc. on September 15, 2006 and the July 17, 2007 request letter issued by the Solid Waste Section.

The *Swift Creek Monitoring Plan – Dewatering Program* consists of demonstrating the effectiveness of the *Dewatering Analysis* by installing an intercepting cut-off drain with two adjacent piezometers and monitoring these water levels. The *Swift Creek Monitoring Plan – Dewatering Program* also includes monitoring water levels within the existing piezometers and monitoring wells on a quarterly basis. The water level data will be included within the semi-annual monitoring reports. As a result, *Swift Creek Monitoring Plan – Dewatering Program* is approved as described.

In addition, please repair or replace the damaged piezometers as indicated within the *Swift Creek Monitoring Plan – Dewatering Program*. Please also mark the surface water locations in the field and indicate their locations on the site figures.

Please call me at 919-508-8500 if you have any questions or concerns regarding this correspondence. Thank you for your continued cooperation in this matter.

Sincerely,

Jaclynne Drummond
