RE: Review of the Solid Waste Compost Facility Application for Permit
 -- County of Buncombe, North Carolina.

WILLIAM L. MEYER
 DIRECTOR

A hydrogeologic review for the Buncombe County Compost Facility has been completed. The following questions and comments need to be addressed in order to determine compliance with the rules.

Provide a site plan that shows the groundwater monitoring wells for the Municipal Solid Waste and the Construction & Demolition Landfills. The cell limits of the Construction and Demolition Landfill also need to be shown.

Page 3: Item 4 discusses a well intended for the compost facility. What is the purpose of this well? How will the well be constructed? Provide its approximate location on the proposed construction plan along with the septic tank drainfield.

Page 4; Provide documentation explaining how the 6 inch thick concrete pad meets the .1404 (10)(E) rule.
