MEMORANDUM

DATE : 3/23/2011
TO : Mike Gurley – Republic Services
FROM : Ralph Calistri (jetcleanamerica@yahoo.com)
SUBJECT : CMS Landfill – New Cell Expansion – 2011

Our recent report for the CMS landfill new cell expansion documents that Cleanout 1 was video-inspected twice over the course of the project. The first video-inspection was carried out the full 488.6' distance of the pipe with no defects noted, but showed some remaining straw material in the pipe over the first roughly 100.0' downstream from Cleanout 1. To remove the remaining straw material, the pipe was jetcleaned a second time, with a corresponding second video-inspection to confirm successful removal. Please reference Setups 1 & 2, on Video 1.

Please contact us at 800-226-8013 with any further questions.

Thank you.

Ralph Calistri – Jetclean America – 800-226-8013
