However, Request #1 of that letter addresses a requirement that information be submitted regarding as-built drawings and CQA documentation 'for the construction of a concrete liner to allow heavy equipment access to clean out the storm water basin', no information regarding this matter has yet been received by this office. Once the Division has received the required information, then the processing of Duke Energy's request for modification of the permit to operate will be completed. You may submit this information directly to me at the address on the bottom of page one of this letter. I would appreciate that the submittal contains one printed copy and one electronic copy in pdf format for processing purposes.
