Hi Marta. Thank you for letting me know about your desire to change the date for this year's (2011) sampling event. The Solid Waste Section approves your request. Please let me know if you have any future questions or concerns.

Subject: Clay County Landfill

Ms. Werner,

I was working on preparing December 2010 Water Quality Monitoring Report for Clay County Closed Municipal Solid Waste Facility dated March 11, 2011. We would like to conduct next sampling event in September 2011 instead of December 2011 (all previous monitoring events were conducted in December each year). I was wondering if changing time of sampling event is okay for us to do or do we have to ask for approval. Clay County is required to monitor ground water and surface water once a year.

Please let me know if you have any questions.

Thank you.
