Re: Request for Modification to Analytical Parameters  
Columbus County Landfill  
Permit No. 24-01

Mr. Sellers:

The Solid Waste Section (Section) has reviewed the request by Babb and Associates, P.A. to reduce the number of analyses performed on samples collected from monitor wells MW-11 and MW-12 at the site. In response to the request and in accordance with Title 15A NCAC 13B .1634(e), the Section herein approves the analyses of wells MW-11 and MW-12 for Appendix I constituents only.

Based on the results of future groundwater monitoring events, the Section may determine that it is necessary for the facility to revert to assessment monitoring or proceed with determining the extent of release and evaluating remedial options.
