NOTICE OF VIOLATIONS:

None

You are hereby advised that, pursuant to N.C.G.S. 130A-22, an administrative penalty of up to \$5,000 per day may be assessed for each violation of the Solid Waste Statute or Regulations. If the violation(s) noted here continue, you may be subject to enforcement actions including penalties, injunction from operation of a solid waste management facility or a solid waste collection service and any such further relief as may be necessary to achieve compliance with the North Carolina Solid Waste Management Act and Rules.

STATUS OF PAST NOTED VIOLATIONS:

None

AREAS OF CONCERNS AND COMMENTS:

1. The permit and operations plan were reviewed. The information was presented in an orderly manner and was available for review.
2. The service area for this facility is Fort Bragg.
3. The hours of operation are 7:30am thru 4:00pm, Monday thru Friday.
4. Documentation needs to be provided that will indicate that waste screening is being performed on at least 1% of the waste stream. Corrective actions need to be underway.
5. Areas previously noted for the need of ground cover have been seeded. I will continue to monitor the ground cover progress.
6. **A ground cover sufficient to restrain erosion is to be provided within 30 days of any grading activity when the area is completed or not active.**
7. The only trained employee is **Robert Anderson**; Certified Landfill Operator Specialist expires March 12, 2007. **I would strongly recommend that another person be certified in the event that Mr. Anderson is unavailable.** GS 130A-309.25 (c) states that "A person may not perform the duties of an operator of a solid waste management facility after 1 January 1998, unless he has completed an operator-training course approved by the Department. An owner of a solid waste management facility may not employ any person to perform the duties of an operator unless the person has completed an approved solid waste management facility operator-training course."
8. The Contingency Plan was reviewed and was up to date.
9. Ground water monitoring is to be conducted semi-annually. Monitoring documentation needs to be available for review during a comprehensive audit.
10. Signs have been installed at the asbestos area to properly identify the area.
11. The wind blown paper was being picked up during the Audit.
12. The exposed waste was being spread out with a compactor and was less than ½ acre. Soil cover has been applied over the previous weeks waste. Good Job!
13. The waste type being accepted at the facility is according to permit.
