Re: Permit Amendment to Construct (New) and Operate (Existing and New)  
City of Fayetteville Transfer Station  
Cumberland County, North Carolina  
Permit No. 26-09T  
Doc ID No. 8115

Dear Mr. Dietzen and Mr. Pflieger:

Enclosed is the above referenced Permit Amendment [DIN 8003] to Construct a new transfer station at the present location and to Operate the existing and new stations under certain conditions contained in the permit. Please review the document carefully and contact me with any discrepancies.

Attachment 2 (the Permit to Construct) on page 5 of 11 lists the conditions you must satisfy before initial operation of the new transfer station. Attachment 3 (the Permit to Operate) lists the conditions for the operation of the existing and new stations. Condition 2 of the PTO requires a closure or operating plan be submitted for the existing station within 60 days of initial operation of the new facility. Again, please contact me with any questions regarding those conditions.

Thank you for your cooperation in this matter. If you have questions about the permit conditions or questions arise during operation, please contact either me at 919.508.8498 or Drew Hammonds, Environmental Senior Specialist for the facility, at 910.433.3351.

Sincerely,

Geoffrey H. Little  
Environmental Engineer
