Subject: Re-permit to Construct & Operate
Barnhill Contracting Company LCID Landfill
at Crowell Site, Cumberland County, NC
LCID Landfill Permit No.: 26-K, Document ID No.: 10298

Dear Mr. Waters:

Enclosed please find the Solid Waste Permit for the subject LCID Landfill and a Certified Copy of the Permit. This permit shall replace the previous permit (DID# 9105) issued to the facility on December 28, 2009. The Permit to Construct & Operate is issued in accordance with Section .0201(c) and consistent with Section .0203 and .0563(4) & (6)(c) of the Solid Waste Management Rules 15A NCAC 13B. Based on the plans submitted, the LCID landfill footprint limits, which are the same limits as permitted dated February 21, 2002, are shown on Sheets No. 8 of 11 "*Remaining Landfill Capacity cross Sections*" and No. 10 of 11 "*Phase Diagram 2.*" The structural fill must be placed to an elevation of 48 feet mean sea level (msl) in the remaining landfill phases, and the LCID landfill is approved for operation to a maximum elevation at the center of the site to 61 feet msl based on the contours and cross-sections depicted on Sheets No. 8 of 11 and No. 10 of 11 dated May 5, 2009.

Please note that the issuance of this permit neither exempts you nor removes your responsibility to comply with any applicable ordinance, regulation, or law that may affect your facility. Additionally, please note Condition No. 6, which states that the permit shall not be effective unless the certified copy is filed in the Register of Deeds office in Cumberland County and the copy is returned to the Solid Waste Section, within thirty (30) working days, from date received, with the page and book number, date of recordation, and Register's seal.

If you or your engineer have any question regarding the subject issues, please contact me at (919)-508-8523. Also, you may contact my supervisor Mr. Ed Mussler at (919)-508-8495.

Sincerely,

Zi-Qiang Chen, PhD.
