Re: Issuance of Permit to Construct and Operate
Snow Hill LCID Landfill
Cumberland County, North Carolina
Permit No. 26L-LCID
Doc ID No. 11001

Dear Mr. McDonald (LCID operator) & Mr. Tew (land owner):

Enclosed is the combined Permit to Construct and Operate of the above referenced facility. Please review the permit carefully and contact me with any questions or concerns.

One permit condition must be met before disposal operations may commence at the facility: Condition 3 (Attachment 1, Part IV, page 3 of 9) requires the permit be recorded with the Cumberland County Register of Deeds under the name of the landowner with a certified copy forwarded to the Solid Waste Section – 1646 Mail Service Center, Raleigh, NC 27699-1646.

In addition, please note two discrepancies between the permit and the Permit Application/Operations Plan. Condition 8 (Attachment 3, Part I, page 7 of 9) states the side slopes must not exceed a ratio of three horizontal feet to one vertical foot (3:1). The cross-sections figure indicates a ratio of two horizontal feet to one vertical foot (2:1). Condition 12 (Attachment 3, Part I, page 8 of 9) states that the solid waste must be covered with one foot of suitable soil at least once a month or when the active area reaches one acre, whichever occurs first. The Operations Plan indicates that the solid waste be covered with six (6) inches of suitable soil. These permit conditions supersede the statements indicated in the Permit Application/Operations Plan.

Thank you for your cooperation in this matter. If you have questions about the permit conditions or questions arise during construction, please contact either me at 919.508.8496 or Drew Hammonds, Environmental Senior Specialist for the facility, at 910.433.3351.

Sincerely,

Elizabeth Werner
Hydrogeologist
