Re: Water Quality Assessment/ Remediation Measures Required at the United Metals Recyclers Landfill, ~~Forsyth County~~.

Dear Mr. Perry,

Water quality data from past sampling of the ground water detection monitoring wells at the United Metals Recyclers landfill indicates chemical constituent levels exceeding water quality standards. Monitoring well data have indicated exceedances of North Carolina State groundwater standards for some time. Pursuant to N.C. Administrative Code 13B assessment measures are required.

United Metals Recyclers should acquire the services of a N.C. licensed professional geologist with experience in assessment of ground water contamination and submit a plan that addresses the objectives United Metals Recyclers believes will address the ground water exceedances. The professional geologist shall consult with the Solid Waste Section about the landfill site prior to developing the plan. The Section will review the submitted plan, approve it, or request more information or amendments before implementation. The plan shall then be implemented as approved.

Please submit this plan to the Section within 90 days. If I can be of assistance or if you have any questions regarding this issue, please contact me at 919-733-0692, extension 261.

Sincerely,

Mark Poindexter
Environmental Compliance
Solid Waste Section
