**RE: Groundwater Monitoring Program  
Atlantic Scrap and Processing, LLC  
Kernersville, North Carolina**

Dear Mr. Wooten:

Thank you for the update you provided during our telephone conversation yesterday. As promised, I am providing a copy of the 1997 Landfill Evaluation prepared by our firm which includes a good summary of the groundwater issues at the this site.

Work should begin shortly on the portion of the closure which will reshape the outslope on the north side of the landfill. One of the first activities will need to be the abandonment of existing MW-3. It is our understanding that abandonment of this well and the existing upgradient well, which no longer produces a reliable recharge rate, is acceptable. Also as discussed, we plan to provide additional information on the proposal for new wells within the next two weeks.

If you have any questions or require additional information, please contact me.

Very Truly Yours,  
**W. Z. Baumgartner & Associates, Inc.**
