ATTACHMENT 2

Conditions of Permit to Operate

Part I General Facility Conditions

1. This permit shall be reviewed on March 13, 2011, pursuant to 15A NCAC 13B .0201(e). No later than November 13, 2010, the owner or operator shall submit to the Solid Waste Section an amendment to the permit or a permit modification prepared in accordance with the applicable rules in effect at the time of the review.
2. Changes in ownership, increase in facility capacity, process changes or receiving additional waste types shall require permit modification.
3. This permit approves the Facility Report that defines the comprehensive development of the facility including the total treatment and processing facility capacity, the type of waste to be treated and processed, and related facility infrastructure in accordance with 15 NCAC 13B .302.
 - a. The approved plans are described in Attachment 1, "Approved Documents," Part IV, Documents 1 and 2.
 - b. Where discrepancies may exist, the most recent approved submittal and Conditions of Permit shall govern.
4. The facility has a total permitted gross design capacity of 500 tons/day (1000-2000 cy/day) to be received and processed consistent with the capacity requested and approved in the Facility Report dated November 22, 2005, "Approved Documents," Part IV, Document 1.
5. Any leachate generated at the facility shall be managed in such a manner that there will be no degradation of ground or surface waters.
6. Soil erosion and runoff from the site shall be controlled. Erosion and runoff control structures shall be in place and approved by the appropriate permitting agency prior to receiving any waste at the facility.
7. The 100-foot buffer shall be maintained free of waste and final product.
8. Only untreated wood, as specifically listed in the permit application, may be managed at this facility without adequate testing and prior approval of the Division of Waste Management. Low carbon-nitrogen wastes, such as grass clippings, shall not be received at the facility. Any heat generation (composting) in any of the piles of material at the facility will be considered a permit violation and shall result in the facility having to meet all requirements of Section .1400 of the Solid Waste Management rules within three (3) months.

9. Nonconforming wastes received at the facility or removed from final product during screening shall be removed from the facility within twenty-four (24) hours and properly disposed of at a permitted solid waste management facility.
10. Groundwater monitoring wells may be required if there is indication of the potential for groundwater contamination.
11. This facility shall be operated and maintained with sufficient dust control measures to minimize airborne emissions and to prevent dust from becoming a nuisance or safety hazard.
12. The amount of waste received and the amount and type of products sold or otherwise distributed shall be reported to the Division of Waste Management by August 1st of each year for the previous July 1st to June 30th.
13. The facility is subject to the requirements of all applicable sections of the most recent version of the North Carolina Solid Waste Management Rules 15A NCAC 13B and the specific conditions contained herein.

Facility Construction Conditions

14. Construction of all solid waste management units within this facility shall be in accordance with the pertinent approved plans and only for those phases of development approved for construction as described in Attachment 1, "Approved Documents".
15. Additional conditions and revisions of the approved documents or changes during construction require approval by the North Carolina Solid Waste Section.
16. Any modifications in sedimentation and erosion control activities require approval by the Land Quality Section. The Solid Waste Section shall be notified of any sedimentation and erosion control modifications.

Facility Pre-Operative Conditions

17. A pre-operation inspection shall be conducted by the Solid Waste Section to ensure the site is in compliance with the rules and the permit conditions, and the operator shall review the operation plan with the Solid Waste Section staff.

PART II Municipal Landfill Unit Specific Conditions

(NOT APPLICABLE)

PART III CONSTRUCTION AND DEMOLITION DEBRIS UNIT SPECIFIC CONDITIONS

(NOT APPLICABLE)

PART IV LAND CLEARING AND INERT DEBRIS UNIT SPECIFIC CONDITIONS

(NOT APPLICABLE)

PART V YARD WASTE UNIT SPECIFIC CONDITIONS

(NOT APPLICABLE)

PART VI TREATMENT AND PROCESSING UNIT SPECIFIC CONDITIONS (Specify Unit Type)
