Attention: Mr. Edward F. Mussler, III, P.E.

Subject: Duke Energy – Allen Steam Station  
Retired Ash Basin CP Landfill  
Permit to Construct Application Submittal

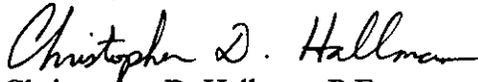

Dear Mr. Mussler:

Attached is the Permit to Construct Application, prepared by Duke Energy's consultant, S&ME, Inc., for the proposed combustion products landfill at Duke's Allen Steam Station in Belmont, N.C. Enclosed is one copy (bound Volumes 1 and 2 and set of drawings) along with an electronic copy of this application. The same information is being submitted directly to Mr. Larry Frost at the Asheville Regional Office. If additional paper or electronic copies are needed, please let me know.

To assist with review of the application and this project, Duke Energy will be happy to arrange a visit to the Allen Steam Station site or meet with you as needed at your convenience.

If there are any questions or if additional information is needed, please contact me at 980-373-7892. We look forward to continue working with you on this project.

Sincerely,

  
Christopher D. Hallman, P.E.
