Attention: Mr. Larry Frost

Subject: Operations Plan – Doc. ID No. 12344  
Duke Energy Carolinas, LLC  
Allen Steam Station  
Retired Ash Basin (RAB) – Ash Landfill  
Permit No. 36-12

Dear Mr. Frost

A review of the December 6, 2010 approved Operations Plans for Duke Energy Carolinas, LLC Allen Steam Station (RAB) – Ash Landfill revealed references to an “approved monitoring plan.” The references are located on page nine, the last paragraph prior to the listing of the constituents that are to be analyzed semiannually for the leachate from the LCS system.

“Leachate from the LCS system shall be sampled in accordance with the approved monitoring plan. Leachate will be sampled semiannually from dedicated sample ports located on the LCS system. Leachate quality will be analyzed and reported consistent with the requirements of the approved monitoring plan. The following constituents will be analyzed for semi-annually:”

Because the Allen Steam Station RAB – Ash Landfill does not have a monitoring plan, Duke Energy proposes to NCDENR to consider removing the two references made to the approved monitoring plan. Removing these references from the operations plan will in no way impact the operations of the landfill. Specifically, deletion of the references does not affect what is presently being performed with regard to the sampling of the leachate from LCS system.

The proposed correction:

“Leachate from the LCS system will be sampled semiannually from dedicated sample ports located on the LCS system. The following constituents will be analyzed for semiannually:”

If you have any questions or require additional information concerning this submittal, please contact me (980) 373-6707.

Sincerely,

A handwritten signature in black ink that reads "Andrew F. Tinsley". The signature is written in a cursive style with a large, stylized initial 'A'.
