Re: Groundwater and Surface Water Monitoring  
Seaboard/Riverdale Landfill Site  
High Point, North Carolina

Dear Jackie:

Based on our discussion yesterday, we understand that the next required groundwater and surface water monitoring event at the Seaboard/Riverdale Landfill site will occur in the spring of 2009. This comprehensive monitoring event will consist of the sampling and analysis of 65 groundwater monitoring wells and 8 surface water stations. The specific elements of this monitoring event are provided in the *Pre-Remedial Groundwater and Surface Water Monitoring Plan* (the Plan), April 7, 2008, which was prepared by ERM NC, PC of Charlotte, NC. We do not plan to conduct any monitoring activities this year or prior to the implementation of the Plan. We understand that the specific elements of the Plan are under review by your office and final approval is expected by December 2008.

If there are any questions regarding this correspondence, please contact me at (919) 325-0696 or Tom Wilson with ERM NC at (704) 541-8345.

Respectfully,  
Babb & Associates, P.A.

Gary D. Babb, P.G.  
President
