Chris Shumate, Service Director

EPA ID NUMBER NCD986232114

REPORT:

Victory Toyota is an auto dealership that does auto sales and general maintenance. No body work is done at the facility.

Victory Toyota currently has about 25 employees and is on an estimated three acres. The facility uses municipal water and sewage. The nearest residence is more than 1/4 mile from the facility. There is one building for sales and auto service. No hazardous waste was observed during the inspection and the facility is operating as a CEG.

There is one 500-gallon tank outside the building for used oil. It was correctly labeled and there were no spills. Enterprise Oil Co picks up the used oil. The facility generates only small amounts of waste gasoline and waste antifreeze, and none was being stored on site at the time of inspection.

The facility has one parts cleaner that is serviced by Safety Kleen. The solvent used has a flash point of 150 degrees. No universal waste was observed. Mr. Shumate was reminded that used fluorescent bulbs cannot be disposed in the landfill but must be managed as universal waste or disposed as hazardous waste, unless TCLP data for mercury is below regulatory levels.

CONCLUSIONS:

Victory Toyota is operating as a CEG. No violations were observed.

For questions about this activity report contact Ernest Lawrence at 336-352-5742.
