Subject: Recycling of Asphalt Shingles
WCA of High Point C&D Landfill and Reclamation Facility
Permit No. 41-16, Guilford County, Document ID 13142

Dear Mr. Smith:

The North Carolina Department of Transportation recently approved the use of post-consumer, tear-off residential asphalt roofing shingles in hot mix asphalt manufacturer. We have been contacted by several companies concerning solid waste permitting requirements. WCA of High Point was indicated as a supplier of recycled shingles for one of the facilities.

Your permit states that if demolition waste is to be sorted and recycled, an asbestos screening plan must be submitted to the Division of Epidemiology of the Department of Health and Human Services for approval and the approved plan forwarded to the Solid Waste Section for inclusion in the operations plan for the facility. We have not received a copy of the approved plan. Please send the approved plan to us as soon as possible.

If you have any questions regarding this matter, please contact me at (919)508-8520 or by email at pat.backus@ncdenr.gov.

Sincerely,

Patricia M. Backus, P.E.
Environmental Engineer
Solid Waste Section
