Re: Groundwater Assessment Monitoring Plan
Closed Wiley Davis Road Landfill
Permit Number 41-B, Guilford County
Document ID Number (DIN) 14090

Dear Mr. Deatherage:

The NC Solid Waste Section (Section) has reviewed the Proposed Surface Water and Groundwater Monitoring Assessment Monitoring Plan submitted on behalf of Griffin Industrial Services by your consultant Waters Edge Environmental in November 2010. The proposal was written in response to a letter dated April 26, 2010 from the Section requesting that the full vertical and horizontal extent of groundwater and surface water contamination at the former Wiley Davis Road landfill be characterized. The plan proposes the installation of two shallow groundwater monitoring wells on the south side of the creek to determine whether contamination detected in groundwater wells on the landfill site has migrated south of the creek. In addition, two surface water samples will be collected at strategic points between the groundwater wells on either side of the creek. After receipt of laboratory analyses, please submit a report to the Section detailing field work, laboratory results, conclusions, and if appropriate, plans for additional assessment.

If you have any questions, you may contact me at (919)508-8506.

Sincerely,

Christine Ritter
Hydrogeologist
Solid Waste Section
