I need to know which deed book reference (of the two mentioned in my previous e-mail) is the appropriate one to use for this permit.

The 42-acre tract was subdivided from the original A-1 Sandrock property, which had the address 2132 Bishop Road. The former access from the south has been completely blocked and the site is now accessed from other Viewmont Sandrock property located 4048 Viewmont Road, i.e., the large tract to the east of the subject site. The access road to the 42 acres shows on the drawings across the tract to the east. Both of the Viewmont properties are covered in the mining permit. I hope that clears it up.

David-

Thank you for the revised figures and text. I have one more question about the deed information for the LCID property which also needs to be put into the permit. I have a copy of the Guilford County Register of Deeds from your permit application that says Book 5590 page 1440-1443, which is dated August 25<sup>th</sup> 2003. Then I have a copy of the Certification by Land Owner, dated December 3, 2009 which shows the land located at 4048 Viewmont Road is in Deed Book 5263, page 814. Can you please clarify? Thank you,  
Christine

Per your request, I have modified pages 5 and 6 of the LCID renewal application (see attached pdf). The size and capacity of Phases 1 and 2 are included on page 5. References to Phase 3 have been removed in the text and Figure 2. I have amended three drawings that accompany the application (Sheets 6, 7, and

9) to remove Phase 3 – these will be sent as separate messages due to file size. Please contact me with any further questions or comments. Thank you.

Hi David-

I would like some additional information from you since you are revising the text and figures for the permit application of the Viewmont Sandrock LCID facility. I would like to know the acreage of each phase, Phase 1 and Phase 2, and also, I would like to know the total capacity in cubic yards of each phase. That information needs to be included in the permit.

Thanks,

Christine
