## ATTACHMENT 1

### PART I: PERMITTING HISTORY

Permit	Date
Date of Original Issue (Phase 1)	April 28, 2004
Permit Amendment (Phase 1A)	July 2, 2010

### PART II: LIST OF DOCUMENTS FOR THE APPROVED PLAN

1. *L.C.I.D. Permit Application for Phase 1A, D & D Grading, Inc. 1411 Rankin Mill Road, McLeansville, NC 27301.* Prepared by: Evans Engineering, Inc. November 18, 2009, Document ID Number (DIN) 10671.
2. Updated Operations Plan and revised drawings submitted June 23, 2010 in support of 5 year permit renewal application, DIN 110171.
3. *L.C.I.D. Permit Application for D & D Grading, Inc., 1411 Rankin Mill Road, McLeansville, North Carolina 27301* . 10 April 2001, received 14 June 2001. Prepared by: Evans Engineering, Inc. Original submittal documents include the application narrative, soil test and boring records, Zoning Approval (dated 27 November 2000), Sedimentation and Erosion Control Plan, design drawing, and Site Operations Plan.
4. Revision to the original permit application submitted by Evans Engineering, Inc. 31 December 2002. Including revised drawings 1, 2, 3, 4 of 4, a revised Operations Plan, and additional topographical and volumetric information, and a property deed.

### PART III: PROPERTIES APPROVED FOR THE SOLID WASTE FACILITY

Property	Book	Page	Acreage	Grantor	Grantee
Original Permit	3892	1478-1481	33.85	Charles William Fagg and wife, Patsy Southern Fagg	David E. Dick
<b>Total Site Acreage:</b>			<b>33.85</b>		

Note: Deed book reference is from Guilford County, NC Register of Deeds office.

#### **PART IV: GENERAL PERMIT CONDITIONS**

1. This permit is issued by the North Carolina Department of Environment and Natural Resources, Division of Waste Management, Solid Waste Section (Section). In accordance with North Carolina Solid Waste Management Rule 15A NCAC 13B .0201(e), a land clearing and inert debris solid waste management facility permit may be combined in two parts: a Permit to Construct and a Permit to Operate. The Permit to Construct shall expire on July 15, 2015. The Permit to Construct conditions are contained in Attachment 2 of this permit. The Permit to Operate shall expire July 15, 2015. The Permit to Operate conditions are contained in Attachment 3 of this permit.
2. The persons to whom this permit is issued ("permittee") are the owners and operators of the solid waste management facility.
3. This permit shall not be effective unless the certified copy is filed in the Register of Deeds Office and indexed in the grantor index under the name of the owner of the land in the county or counties in which the land is located. The certified copy of the permit, affixed with the Register's seal and the date, book, and page number of recording must be returned to the Division of Waste Management, within 30 (thirty) calendar days. If the Section does not receive the certified copy of the recorded permit within 30 calendar days of issuance of the permit, then and in that event, the permit is suspended and of no effect until the date the Section receives the certified copy of the recorded permit.
4. When this property is sold, leased, conveyed, or transferred in any manner, the deed or other instrument of transfer must contain in the deed description section, in no smaller type than that used in the body of the deed or instrument, a statement that the property has been used as a land clearing and inert debris landfill and a reference by book and page to the recordation of the permit.
5. By beginning construction or receiving waste at this facility the permittee shall be considered to have accepted the terms and conditions of this permit.
6. Construction and operation of this solid waste management facility must be in accordance with the Solid Waste Management Rules, 15A NCAC 13B, Article 9 of Chapter 130A of the North Carolina General Statutes (NCGS 130A-290, et seq.), the conditions contained in this permit; and the approved plan. Should the approved plan and the rules conflict, the Solid Waste Management Rules shall take precedence unless specifically addressed by permit condition.

7. The permit is issued based on the documents submitted in support of the application for permitting the facility including those identified in Attachment 1, "List of Documents for Approved Plan," and which constitute the approved plan for the facility. Where discrepancies exist, the most recent submittals and the Conditions of Permit shall govern.
8. This permit may be transferred only with the approval of the Section, through the issuance of a new or substantially amended permit in accordance with applicable statutes and rules. In accordance with NCGS 130A-295.2(g), the permittee must notify the Section thirty (30) days prior to any significant change in the identity or business structure of either the owner or the operator, including but not limited to, a proposed transfer of ownership of the facility or a change in the parent company of the owner or operator of the facility.
9. The permittee is responsible for obtaining all permits and approvals necessary for the development of this project including approval from appropriate agencies for sedimentation and erosion control, and a General or Individual National Pollutant Discharge Elimination System (NPDES) Stormwater Discharge Permit, if applicable. Issuance of this permit does not remove the permittee's responsibilities for compliance with any other local, state or federal rule, regulation or statute.

*- End of Section -*

## ATTACHMENT 2 CONDITIONS OF PERMIT TO CONSTRUCT

### PART I: FACILITY SPECIFIC CONDITIONS

1. Pursuant to the NC Solid Waste Management Rules (Rule) 15A NCAC 13B .0201(c) and (e), this permit approves construction of Phase 1A of the D & D Grading, Inc. LCID Landfill totaling 13 acres.
  
2. The landfill is permitted for a total gross capacity of 387,142 cubic yards. Gross capacity is the measured volume between the bottom of waste and the top of final cover. Development of the landfill is approved as summarized below:

	Acreage	Capacity	Status
		(cubic yards)	
Phase I	0.9	14,250	Constructed
Phase IA	2.6	59,075	Permitted
Phase 2	1.9	62,709	Not permitted
Phase 3	1.9	62,709	Not permitted
Phase 4	1.9	62,709	Not permitted
Phase 5	1.9	62,709	Not permitted
Phase 6	1.9	62,709	Not permitted
Totals	13.0	387,142	--

\*Applications must be submitted to the Department for review and approval prior to the Construction and Operation of Phases 2 through 6.

3. The following are required prior to receiving solid waste in a new phase:
  - a. Written certification from a Registered Professional Engineer must be submitted to the Section certifying that the waste disposal unit(s) has been constructed in accordance with the approved plans.
  
  - b. A sign must be posted at the entrance as required by the NC Solid Waste Management Rules Operational Requirements, 15A NCAC 13B .0566(16).
  
  - c. The disposal unit boundary must be accurately identified with permanent markers.
  
  - d. A site inspection and pre-operative meeting must be conducted by a representative of the Section. The permittee must notify the Section's Environmental Senior Specialist and make arrangements for the site inspection and pre-operative meeting.

- e. After completion of the requirements in subparagraphs a. through d. above, the Section Environmental Senior Specialist shall notify the Permitting Branch Supervisor by letter or email that the pre-operative requirements have been met and that the unit(s) may commence receiving waste. The permittee will be copied on the notification and may begin receiving waste at that time.

#### **EROSION AND SEDIMENTATION CONTROL REQUIREMENTS**

4. All earth disturbing activities must be conducted in accordance with the Sedimentation Pollution Control Act of 1973 (15 NCAC 4) and consistent with any other local, state or federal requirements.
5. Facility construction, operations or practices must not cause or result in a discharge of pollution, dredged material, and/or fill material into waters of the state in violation of the requirements under Sections 401 and 404 of the Clean Water Act, as amended.
6. Modifications to the approved sedimentation and erosion control activities require approval by the North Carolina Land Quality Section. The permittee must notify the Section of any sedimentation and erosion control plan modifications.

*- End of Section -*

## ATTACHMENT 3

### CONDITIONS OF PERMIT TO OPERATE

#### PART I: FACILITY SPECIFIC CONDITIONS

1. This Permit to Operate expires July 2, 2015. Pursuant to 15A NCAC 13B .0201(g), no later than March 2, 2015, the owner or operator must submit a request to the Section for permit review and must submit updated facility plans meeting the requirements of Rule 0.565 and .0566.
2. This facility must conform to the operational requirements of the NC Solid Waste Management Rules, 15A NCAC 13B .0566, and to the operational plan required by 15A NCAC 13B .0565(4).
3. This Permit to Operate authorizes the operation of Phase 1A at the LCID Landfill when the Permittee has complied with the conditions contained in Attachment 2 (Conditions of Permit to Construct) of this permit. Phase 1A has a total of 59,075 cubic yards of gross capacity in accordance with the approved plan referenced in Attachment 1, Part II of this permit (List of Documents For the Approved Plan).
4. This facility is permitted to receive land clearing waste; yard trash; untreated and unpainted wood; uncontaminated soil; inert debris such as unpainted rock, brick, concrete, and concrete block; and asphalt in accordance with NCGS 130-294(m).
5. The daily intake tonnage is estimated at 23.6 tons per day. Phase 1A covers 2.6 acres and is expected to contain 59,075 cubic yards. The proposed facility boundary remains the same as in the original permit.
6. This facility is permitted to receive waste generated within Guilford County, Rockingham County and Alamance County. Proposed changes to the service area must be submitted to the Section for review prior to any changes in accordance with Condition No. 10 of this Attachment.
7. The permanent markers that accurately delineate the waste disposal boundary must be maintained.
8. Excavation, grading and fill material side slopes must not exceed a ratio of three horizontal feet to one vertical feet (3:1).

9. Open burning of land clearing waste is prohibited. If a fire occurs, the permittee must provide oral notification to the Section within 24 hours of the occurrence followed by a written report of the details of the fire within 10 working days of the occurrence. The report must include the cause, the location(s) on the premises, the dimensions and volume of material involved, a description of emergency response activities with results, and a description of mitigation measures implemented to reduce or eliminate conditions leading to the fire. Other conditions may be required based on the severity or nature of the fire.
10. Revisions to the design or operation of the facility or changes to the facility service area must be submitted to the Section for review and approval prior to the implementation of any changes. Revisions or changes that require modification to the permit will be subject to the appropriate permitting fee.
11. Amendments or revisions to the NC General Statutes or to the NC Solid Waste Management Rules or any violation of ground water standards may necessitate modification of the approved design or operation plans, waste acceptance requirements or may require closure of the facility.

#### **Cover Material Requirements**

12. Solid waste must be covered with 1 foot of suitable soil cover at least once per month or when the active area reaches 1 acre in size, whichever occurs first, or more often when necessary to prevent the site from becoming a nuisance or to mitigate conditions associated with fire, windblown materials, vectors or excessive water infiltration.
13. The facility must maintain a supply of cover material adequate to cover the working face in case of an emergency or fire, at all times.
14. Vegetative ground cover sufficient to control erosion must be established within 30 (thirty) working days upon completion of any phase of LCID landfill development or as addressed in the approved Sedimentation and Erosion Control permit.
15. Within 120 calendar days after completion of the final disposal operations, the disposal area must be closed and covered with a minimum of 1 foot of suitable soil cover sloped to allow surface water runoff in a controlled manner. However, for ditches with depths greater than 6 inches and widths less than 3 feet located on the landfill, at least 2 feet of soil is required between the bottom elevation of the ditches and the waste mass.

### **Drainage Control and Water Protection Requirements**

16. All required sedimentation and erosion control measures must be installed and maintained to mitigate excessive on-site erosion and to prevent silt from leaving the site of the landfill unit during the service life of the facility.
17. Ground water quality at this facility is subject to the classification and remedial action provisions of 15 NCAC 2L.
18. Solid waste must be placed a minimum of four feet above the seasonal high water table.
19. Solid waste must not be disposed in standing water. Surface water must be diverted away from the operational area and must not be impounded over or in waste.
20. Leachate must be properly managed on site using best management practices.

*- End of Permit Conditions -*

I do hereby certify that the attached PERMIT TO CONSTRUCT/LETTER OF CLOSURE is an exact and true original of PERMIT NUMBER 41S-LCID for the D&D Grading Inc., Land Clearing and Inert Debris Landfill.
