**RE: Halifax County C&D Landfill (Permit No. 42-04)
Continued Operation of C&DLF Unit on Top of Closed MSWLF**

Dear Mr. Crissman:

On behalf of Halifax County, Richardson Smith Gardner & Associates, Inc. (RSG) would like to update you on the status of the above referenced facility relative to the implementation of the new C&D landfill rules (15A NCAC 13B .0531-.0547).

Project Background

This C&D vertical expansion was originally permitted in December 1997 and began operation on January 1, 1998. In December 2006, the permit was reissued to approve operation of the landfill through June 30, 2008.

Remaining Airspace and Life Expectancy

Based on a review of existing conditions, there appears to be around one year of airspace remaining to permitted grades depending on actual waste to be received. Also, there is additional airspace available above the permitted grades as is shown in the phasing plan in the pending permit application for the County's new C&D landfill unit (Area 2). Note that this application has been on file with the DWM since April 2006.

Thus, Halifax County plans to continue to operate their C&D landfill beyond the June 30, 2008 deadline for closure under the "old" C&D landfill rules (15A NCAC 13B .0501-.0510). In doing so, the County intends to comply with Rule 15A NCAC 13B .0547 which requires that a permit application be submitted prior to July 1, 2008 which contains the following:

- Local government approval;
- Operations plan;
- Corrective action plan;
- Closure and post-closure plan;
- Financial assurance.

Corrective Action Plan Implementation

RSG will be working for the County to implement the required corrective action plan. As part of this work, we understand that an Assessment of Corrective Measures (ACM) report is due to the solid waste section by September 1, 2007.

Mr. Paul Crissman
