Hi Tim,

The Solid Waste Section grants Conditional Authorization for operating the Rasper Process as described in the Application for Permit dated September 2007 (and logged as Solid Waste Section Doc Id No. 3766) until the Permit to Operate is issued. This authorization is granted under the following conditions:

1. Operation must be consistent with the operating conditions contained in the Permit Application (SWS DIN 3766, attached) and the existing permit 43-08,
2. Facility operation including the storage of scrap tires and processed materials must not create or cause a nuisance, and
3. You contact and arrange with Drew Hammonds (Andrew.Hammonds@ncmail.net, 910-433-3350) to arrange for a meeting to discuss facility operations.

This authorization does not waive any responsibility you have to comply with any other applicable local, state or federal regulations that may affect the facility operations.

I anticipate that a modified permit will be issued shortly. In the interim, please let me know of any questions or comments you may have regarding this authorization.

Sincerely,

Geof Little
