Re: Weeks Sandpit #2 LCID Landfill
Permit #43F
DIN 11470

Geof:

After a field inspection of the referenced site conducted on August 2 and again on August 19 the following observations were made:

The facility has been substantially constructed in accordance with the plans, the application and the permit.

The placement of waste boundary markers for Cell 7 and Cell 1 are at the planned and permitted locations.

Cell 7 is the "2-acre Notification Site" and will be completed and closed during the initial phase of operation of Cell 1. This work will be done in accordance with the Operations Manual including the installation of an all weather road into Cell 1.

To date, NC-DENR Division of Land Quality has not approved the installed erosion control measures.

Provided that Land Quality approves the erosion control, the site is ready to begin operations and accept land clearing and inert debris.

Give me call if you have any questions.

Thank you, for your help.

Sincerely,

Charles R. Piratzky, PE
