**Re: Haywood County Materials Recovery Facility, Permit 44-08:
Temporary shut down of operations due to scheduled maintenance**

Dear Mr. Frost:

This letter serves as a formal notice to inform you of scheduled maintenance that is going to be done to our baler. We will be realigning the baler starting on February 23 @ 3:30 P.M. The process in the past has taken about 2 months to complete. During this time we will have to send all commercial trucks to the landfill but we will provide 30yard roll offs for households convenience located on the tipping floor for safety reasons. This will accommodate for the disposal of bulky items that cannot be disposed of at the convenience centers. Estimated completion date will be April 26, 2008.

If you have any questions concerning this matter, please feel free to contact me at (828) 627-8042.

Sincerely,

Stephen King
Director of Solid Waste Management
