Dear Jim,

Thank you for the letter reminding us of our June 28th deadline. However, we would like to request an additional sixty day extension to allow us to finish the final excavation on our current Construction and Demolition Landfill. The final excavation will take longer than the June 28th deadline.

As you know this C & D cell is rapidly filling up. We estimate it will be filled by October of 2005. This extension would allow us the opportunity to place the disaster debris in the most appropriate location within the remaining space. If we move the debris now it would become a hindrance in the final excavation process.

We appreciate your consideration of this matter.

Sincerely,

James L. Huff
