Larry,

It was a pleasure meeting with you last Thursday! I hope your visit was enlightening and that you were able to dispell some of the visions you had conjured up in your mind from Ms. Aizha(sp) relayings!

I appoligize for the delay in getting this turned around, but here is what the numbers stack up to based on waht I reviewed with you last week.

Highest volume over the past five years 2008 with a weekly volume of 227,984 pounds.

This will add up as follows;

\$45,598 disposal fee based on .20 per pound at Curtis Bay Energy, Baltimore , Maryland
18,000 transportation fee 10 loads at \$1,800 per load round trip
855 City of Baltimore tipping fees at \$7.50 per ton
220 Ceritifed scale fee at \$22 per load
\$64,673 Total

I would suggest we use a round number of \$68,000 as the value of the finacial assurance instrument. If you find these numbers to be consynct with your understanding, I will get you in contact with Mr. Ken Mai, our CFO, so he can get the instrument in place and the two of you can work out the verbage to your requirements.

Please let me know if this is good for you. We will now put energy into review of the draft permits for Mathews and Gastonia, so we can go forward there as well.

Please feel free to hit me with any questions and again it was a pleasure to meet you and begin to get to know you some!

Best regards,
Tom L. Hulme
