Re: Water Supply Well Sampling Results
539 Baltimore Road, Warrenton, NC

Dear Ms. Smith:

This letter is to inform you of the recent water supply well (WSW-1) sampling results conducted on February 25, 2010. Resolve Environmental Services, PLLC (Resolve) has been contracted by the Warren County Solid Waste Department to conduct semi-annual ground water sampling activities at their facility. The water supply well connected to your residence was included in the sampling schedule.

Concentrations of barium (23.9 µg/L), copper (7.94 µg/L), zinc (12.2 µg/L), mercury (0.338 µg/L) and tetrachloroethene (0.314 µg/L) were detected in the ground water sample collected from WSW-1. **Please note that these concentrations do not exceed the applicable North Carolina Ground Water Quality Standards (NCGWS) presented in the North Carolina Administrative Code Title 15A Subchapter 2L .0202, if published.** A copy of the analytical laboratory results has been included as an attachment. This information has been submitted to the NCDENR Solid Waste Section and will be maintained in their files.

As part of the ongoing sampling schedule at Warren County Landfill, WSW-1 will be sampled again in August 2010. The analytical results will be forwarded to you following the receipt of the analytical report. If you have any questions, please call me at (704) 289-5881.

Sincerely,
Resolve Environmental Services, PLLC

Laura Minor
