**Subject: Application for a Permit to Construct Landfill No. 3 - Weyerhaeuser Company,
Plymouth, NC**

Dear Ms. Marks:

We have enclosed an application for a Permit to Construct a new industrial solid waste landfill (designated as "Landfill No. 3") at Weyerhaeuser's mill in Plymouth, North Carolina. This documentation is to replace an application previously submitted to North Carolina Department of Environment and Natural Resources (NC DENR) in November 1993. The revised application package now consists of 2 volumes of narrative, background data, and calculations in addition to a 22-sheet plan set. Five copies of the text and drawings are provided for your use.

Weyerhaeuser and RMT personnel have already advised you of some of the design changes and groundwater issues since the 1993 application was developed. Please note that response to groundwater modeling questions in your letter dated April 29, 1999, are provided in Appendix **FG** of the narrative. Weyerhaeuser intends to begin construction by the Spring of 2000, and we hope that groundwork has been laid for an expeditious review.

If you have questions regarding any part of these documents, please direct your questions to Joe Kloeker at 252-793-8693, Wynne Shaw at 252-793-7159 or Kent Nilsson at RMT (864-281-0030).

Sincerely,

Mr. Mike Edwards
VP/General Manager
