Lloyd S. Cook, Solid Waste Manager
Wayne County
460B S. Landfill Road
Dudley, NC 28333

Dear Mr. Cook,

This is to approve the request of Wayne County to use 1990-91 as an alternative base year for measuring progress toward the waste reduction goal as provided for in GS 130A-309.04.

This establishes the base for solid waste reduction planning as a part of your comprehensive municipal solid waste management plan.

We were unable to find a record of your original request for an alternative base year. It is one of our goals to promptly respond and regret not responding to you earlier.

We wish you continued success in developing waste management programs. If there is anything we can do to be of assistance, please let us know.

Sincerely,

Dexter Matthews, Chief
Solid Waste Section

Re: Full Approval of the Transition Plan for the Wayne County MSW Landfill, Permit Number 96-01

Dear Mr. Cook:

The Division of Solid Waste Management has completed its review of the transition plan for the referenced landfill submitted by the consultant, Municipal Engineering on behalf of the owner and operator, Wayne County.

Rule .1603(a)(4)(A) of the solid waste management rules codified at 15A NCAC 13B requires the owner and operator of an existing MSWLF unit to submit a transition plan application for continuing operation and closure of the existing MSWLF unit by April 9, 1994. Rule .1617(d) requires that the plan contain: an operation plan in accordance with Rule .1625, a closure and post-closure plan in accordance with Rule .1629, a water quality plan in accordance with .1623(b)(3), and a report that contains a schedule for closure of the existing MSWLF unit and, if necessary, submittal of an application for a new facility, a lateral expansion or permit renewal.

Rule .1603(d)(2) requires the Division to establish a review schedule for the transition plan applications which determines the adequacy of all the plans by October 9, 1996. The rule allows the Division to issue full or partial approvals and to determine the schedule for closure of the existing MSWLF unit based on its review of the complete transition plan application.

In accordance with Rule .1603(d)(2), the Division has completed its review of the submitted application as amended through March 18, 1996, and hereby issues full approval of the transition plan for the referenced landfill.

The approved transition plan shall be effective through December 1997, or until the permitted contours are reached. Rule .1625(b)(3)(C) requires that operation drawings illustrate annual phases of development which are consistent with the minimum and maximum closure slope requirements. In accordance with this rule and Rule .1627(c)(10)(A), the existing unlined MSWLF unit shall be operated in such a manner as to cease receiving solid waste on or before

Mr. Cook

RE: Additional Hydrogeologic Review Of The Transition Plan For The
Wayne County MSW Landfill, Permit # 96-01

Dear Mr. Sullivan,

The Solid Waste Section Hydrogeologic Unit has completed a review of the January 1996 revisions to the Transition Plan for the Wayne County Landfill. There is still one item that has not been responded to. Please provide a response to the following comment:

In the SUMMARY REPORT section of my previous letter of Nov.15,1995, information was requested on the water supply wells located within 500 feet of the waste boundary. Additional information is needed on the exact location and construction details of these wells.

If no well construction records are available, please find out as much information as possible based upon visual observation. Are the wells large diameter dug or bored wells, or smaller diameter drilled wells? What is the estimated depth of each well?

If the landfill itself has a water supply well, please provide information on the location and design of this well too. Also, if available, please provide any sampling analytical data.

Please provide the necessary revisions to the Transition Plan as soon as possible so the Solid Waste Section can complete our technical review. If you have any questions regarding this letter, please contact me at (919) 733-0692, extension 258.

Sincerely,

Bobby Lutfy, Hydrogeologist
Solid Waste Section
