Christine,

Thanks for the quick response. If you were seeking the new cross-sections with the updated subgrade, a map of the subgrade to be included in the Hydro report, and a methane monitoring plan, I can send those to you. Am I leaving anything else out? Also let me know how you would like this information sent (hard copies/ electronic/ both).

Thanks again.

Hi Maddie-

I am not sure if we have figured out who exactly is handling those facilities, but for now you can forward the CAER reports to me.

Regarding the Wayne County MSW Landfill, I understand that responses for additional information were submitted to Ming. Did those responses incorporate the hydrogeology issues we discussed when you were in our office or do you still want me to write a letter directly addressing the hydrogeology issues?

Christine

Ms. Ritter:

I am working on the Corrective Action Evaluation Reports for Lenoir and Wayne Counties. When I checked with Ms. Jackie Drummond regarding who would be reviewing the reports, she requested I contact you concerning those counties. Please let me know to whom I should submit those reports. I hope to be sending out the Lenoir Report this week. Thank you.
