Garner NC 27529

Dear Wayne:

Barbed wire fencing has been permanently installed around the following ten (10) landfill groundwater monitoring wells: P6D, P6S, P17, P18, P18D, P19, P20D, P20S, P21, and one with the registration # 2091. The fencing will be inspected once per month and any needed repairs will be made to insure the cattle do not have access to the monitoring wells.

We understand this means of control is satisfactory to DENR.

Thank you.

Sincerely,

Robert Allen
Solid Waste Director
