SOLID WASTE SECTION
ASHEVILLE REGIONAL OFFICE

6/3/2010
Allen Gaither
NCDENR
2090 US Highway 70
Swannanoa, NC 28778

Mr. Gaither:

We have made two physical changes to our transfer station. They are as follows:

- Installed approximately 10 feet of tile in an existing ditch behind our recovery building and adjacent to a portion of our closed landfill (marked "a" on the enclosed aerial view)
- Dug out the bank beside currently existing sheds in order to have room to place a roll off (marked "c" on the enclosed aerial view)

The following are changes we intend to make in the future:

- Install approximately 5 feet of tile in an existing ditch behind our recovery building and directly across the roadway from the tile mentioned above (marked "b" on the enclosed aerial view)
- Extend and enclose our existing recycling/white goods building along with adding a concrete pad (marked "d" on the enclosed aerial map) (drawing also enclosed)

All of these changes were discussed with and authorized by Troy Harrison during his last inspection. NCDENR gave us a grant and authorized the plans for the addition to our existing building and the concrete pad beside it.

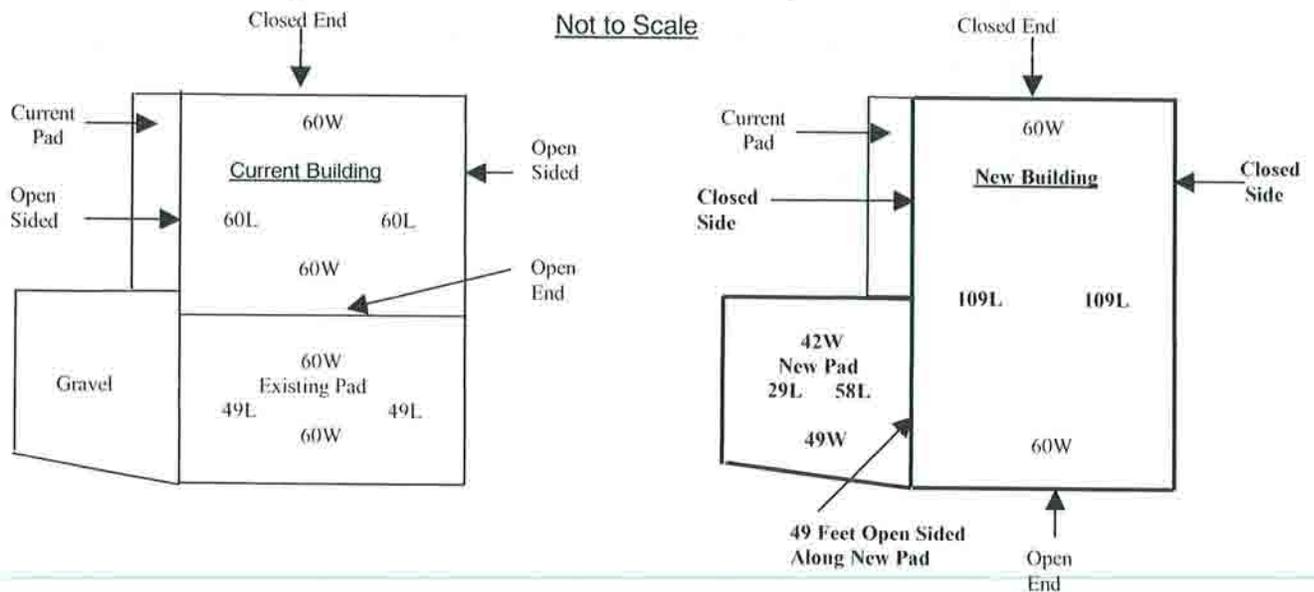

Please let me know if you have any questions.

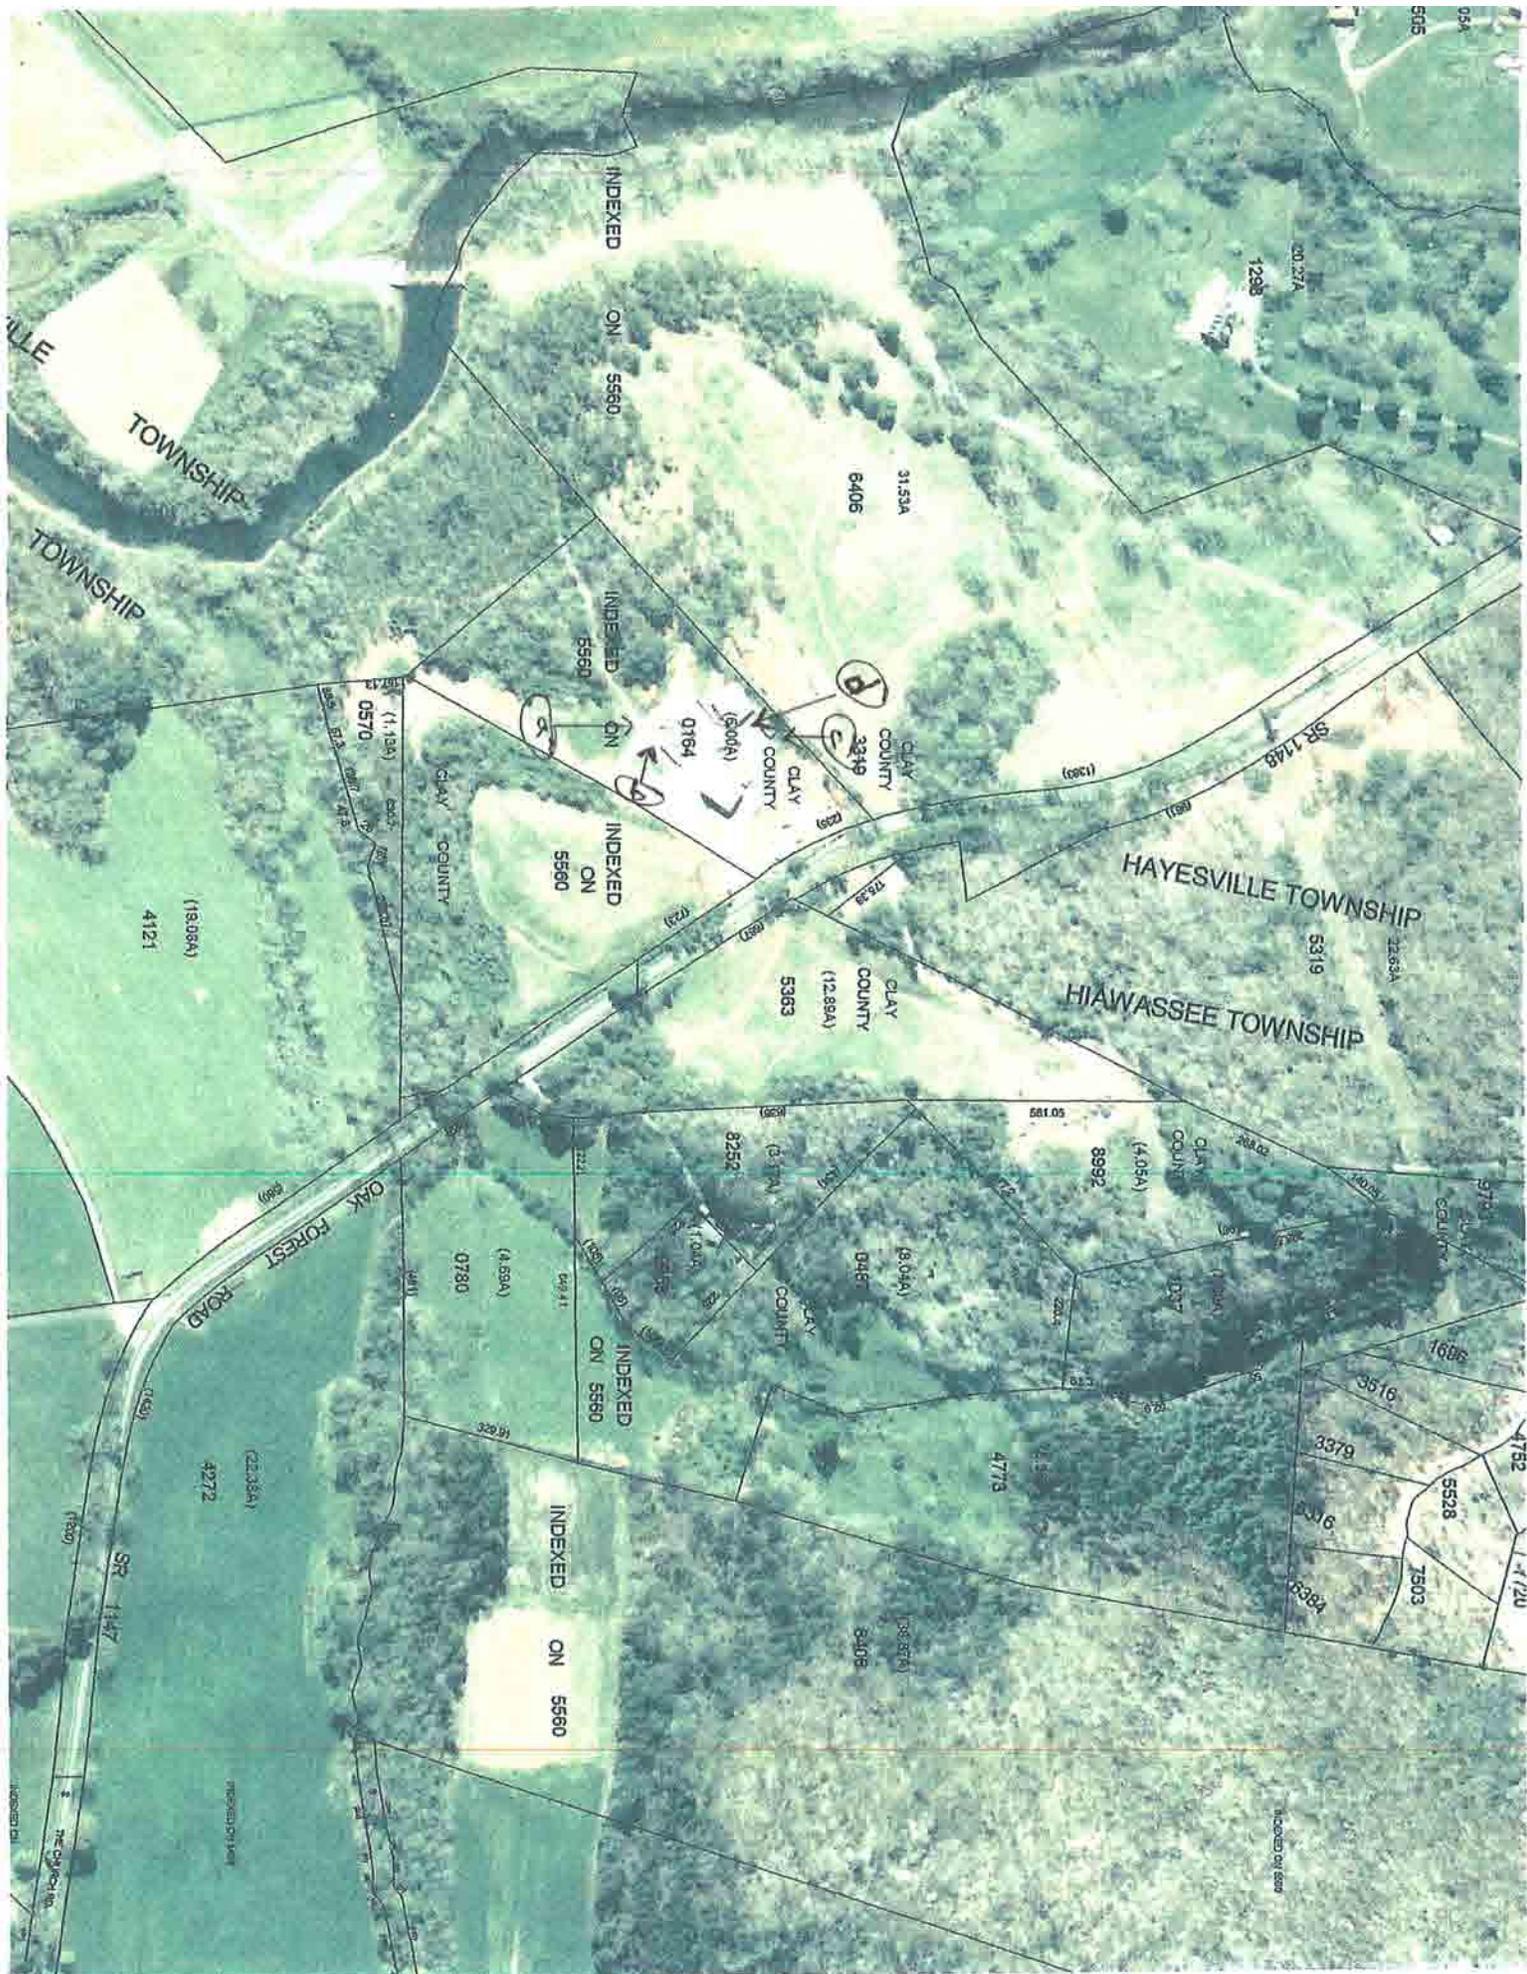

Jim Smith
Solid Waste Director

Description of Proposed Changes to Recycling/White Goods Building

These changes will enclose and extend our current recycling/white goods building. The size increase is from 60W x 60L to 109L x 60W. A new 29L x 42W x 58L x 49W abutting concrete pad, with retaining walls, will also be added. As a result of the new construction, two sides of the building will be fully enclosed and one partially enclosed. The front and a portion beside the new pad will be open. The new extension will be built on an existing 49L x 60W x 49L x 60W concrete pad.
