Re: Permit Application information for Air Curtain Treatment & Processing facility.

Item 1-

The Powells Point Fire Department Station is less than a half of a mile from our facility & will come when summoned to promptly contain an unwanted fire. Additionally pumps set up near the ACE pit & cool down area can also be used to pump water from the pond for the purpose of fire suppression. Soil & heavy equipment to move the material will be on hand to be used for this purpose also.

A handwritten signature in black ink, appearing to be "J. H. Barber", is located at the bottom of the page.

Certification by Land Owner: [All persons or organizations with an ownership interest in the land shall execute the certification.]

I hereby certify that I have read and understand the application submitted by Green Acres Land Development and Septic Systems for a permit to operate a solid waste management facility; a Land Clearing Debris collection site/Air Curtain Burner processing facility on land owned by the undersigned, located off of State Road 1112, Tax Map 124 and Lot 62C, Powells Point, North Carolina in Currituck County. I specifically grant permission for the operation of the proposed Land Clearing Debris collection site/Air Curtain Burner processing facility planned for operation on the property, as indicated in the permit application. I acknowledge that under the law, the land owner and facility operator are responsible for the proper operation and closure of the facility.

I understand that North Carolina General Statute 130A-22 provides for administrative penalties of up to five thousand dollars (\$5,000.00) per day per each violation of the Solid Waste Management Rules. I further understand that the Solid Waste Management Rules may be revised or amended in the future and that the facility's siting and operation will be required to comply with all such revisions or amendments. I further understand that ownership of land that a Land Clearing Debris collection site/Air Curtain Burner processing facility is on, may subject me to cleanup costs in the event that the operator defaults, as well as to claims from persons who may be harmed in their persons or property by using the proposed solid waste management facility.
