RE: City of Rocky Mount LCID Landfill, Permit #33-G

Dear Mr. Barber,

This letter is to provide project certification in accordance with the requirements of item 8 of LCID Permit #33-G and to request issuance of the Permit to Operate. As you will note from the enclosed as-built survey, the all-weather access road has been installed and an initial 3-foot bench of fill dirt has been placed over 50% of Phase VII. This initial fill will serve as a staging area for all land clearing debris and other inert debris. Only Beneficial fill will be placed in areas outside the 3-foot bench until the surface elevation is raised to the beneficial fill elevation indicated on the plans.

The entrance sign and steel survey post have been installed in accordance with items 8b and 8c. Site access is controlled by means of a locked gate and a preoperative meeting was held with Mr. Ben Barnes on February 21, 2005.

Having fulfilled all conditions outlined in item 8 of the permit, we are anxious to place this site in operation and look forward to issuance of the requested Permit to Operate.

Sincerely,

A handwritten signature in black ink, appearing to read 'William Kerr', is written over a circular stamp.

William "Brad" Kerr
Asst. Dir of Public Works/

Enclosure (1)
