Re: Permit to Operate
City of Greensboro, White Street Landfill – Phase II C&DLF over closed MSWLF
Guilford County, Permit No. 41-03, Document ID No. 14351

Dear Mr. Wyrick:

The Division of Waste Management, Solid Waste Section (Section) has reviewed your revised application (DIN 13303) for the continued operation of the City of Greensboro, White Street Construction and Demolition Debris Landfill (C&DLF), Permit 41-03 per 15A NCAC 13B .0547. The revised application adequately addressed most of my comments from October 29, 2010 (DIN 11973), except for the closure plan.

Rule .0547 (4) (d) states the closure and post-closure are to be in accordance with Rule .1629. Rule .1629 (b) (1) (A) further states that a closure plan must include a description of the cap system and the methods and procedures to be used to install the cap that conforms to the requirements set forth in Paragraph (c) of Rule .1627. The objective is to have a design available to implement so that closure activities can be completed as required by the rules. The application closure plan did not include specific plans or details. Engineering drawings, technical specification for materials, a schedule for completing activities, a construction quality assurance plan, etc. should have been supplied in addition to the general items covered in the submitted plan.

In addition, I would suggest that you revise the Construction and Demolition Application Overview that was included in the original application. The waste acceptance and compaction do not agree with the estimates on revised Drawing C-06. Please also include the total gross capacity.

Sincerely,

Patricia M. Backus, P.E.
Environmental Engineer
Solid Waste Section
