Re: Review of Temporary Leachate Loading Station [DIN 8910]
Dunn Erwin C&D Landfill
Harnett County, North Carolina
Permit No. 43-02
Doc ID No. 8917

Dear Tyrus:

We reviewed the above referenced document and concur that the action is an appropriate means of addressing leachate break-outs in the general vicinity of the new leachate recovery well. In follow-up, Ryan Sadler and I spoke by telephone yesterday about the project and discussed the following two conditions that need to be addressed:

1. The loading station must be modified with a liner system to contain leachate spills.
2. An Operations Plan needs to be submitted that addresses the procedures for operating and maintaining the leachate removal system including handling spills and storm water.

These conditions need to be completed by Friday, January 29, 2010.

Thank you for your efforts and cooperation in this matter. If you have questions or comments about the conditions, please contact either me at 919.508.8498 or Drew Hammonds, Waste Management Specialist for the facility, at 910.433.3351.

Sincerely,

Geoffrey H. Little
Permit Engineer
