Compost Central**

**Technical Review Comments
for Large Type-1 Solid Waste Composting Facility Permit Application
and Operations Manual
Facility Permit No.: SWC-60-12**

March 22, 2010

NOTE: Please provide a response to all of the comments on a “comment for comment” basis. Where appropriate, add or revise narrative in the text of the Permit Application that addresses the issues discussed in the comments. In addition, the comments and responses may be included as a part of the revised Permit Application and Operations Manual (e.g. in an appendix).

I. Permit Application Requirements

1. Pages 3 of 5 and 4 of 5, and Figure 1: Provide a preliminary engineering calculation to demonstrate that based upon the footprint of active composting areas, windrow dimension (21’x10’), composting/curing duration (7 months), and curing and storage areas, Compost Central can handle 125,000 tons of wastes and 200,000 cubic yards of mulch operation annually.
2. Rule .1405 (a)(7)(B) stipulates that an application for a composting permit shall provide a Process Flow Diagram. Indicate the quantity of materials on a wet weight and volumetric basis at each process box for both composting and mulch operation (see an example of the diagram).
