Re: Site Suitability Notification – Phase 2 (20 Acres)
C&D Landfill, Inc.
Greenville, NC
Pitt County
Permit No. 74-07
DOC ID# 3890

Dear Mr. Whitehurst:

A review a Site Suitability Application for the Construction and Demolition Debris Landfill (Phase 2) in Pitt County, prepared on your behalf by David Garrett and John Tucker, for the above referenced facility has been completed by the Division of Waste Management, Solid Waste Section. Pursuant to North Carolina Solid Waste Management Rules 15A NCAC 13B .0536(d), 0503(1), and .0504(1), the Division hereby notifies C&D Landfill, Inc. that Phase 2 (total of 20 acres) as proposed is suitable for development as a solid waste management facility as restated below.

Solid Waste Management Rule .0201 requires Solid Waste Permits to be issued in two parts. The first part is a Permit to Construct and the second part is a Permit to Operate. This notification grants you authorization to prepare and submit an application for a Permit to Construct a Construction and Debris Landfill Facility as described in the approved documents.

Should you choose to apply for a permit for the referenced facility, the Permit to Construct Application must be prepared in accordance with 15A NCAC 13B .0535(a)(1) and .0538(b), which includes a facility plan, an engineering plan, a construction quality assurance plan, an operation plan, a closure and post-closure plan (including financial assurance), monitoring plans, and a Design Hydrogeologic Report. There is also a permit application fee that is payable when the application is submitted and must be provided before the Section is otherwise required to review the application. Please note that this letter is not a permit and does not grant any authorization other than as noted above. As provided under Solid Waste Management Rule .15A NCAC 13B .0533(c)(8), the final decision the Division may take on an application is the issuance, modification or denial of a permit.

The North Carolina General Assembly ratified Senate Bill 1492, which was effective August 1, 2007. This bill may warrant future design, construction, and operation criteria at sanitary landfills. In addition, there are additional requirements for owners and operators of sanitary landfills, including demonstration of financial responsibility and an environmental compliance review. The Section is evaluating the requirements of the legislation and will do our best to keep you and your consultant notified of actions or requirements that may affect your application.

The items listed below need to be addressed with the Permit to Construct Application for the new facility being applied for. Please provide the following.

1. A copy of the original property deed including any recent property expansions/purchases.
2. Documentation of the franchise renewal.
3. A copy of the facility Permit that was recorded with the Pitt County Register of Deed's Office.

The Division appreciates your efforts and cooperation in this matter. If you have any questions or would like to schedule a meeting to discuss this matter further, please contact Elizabeth Werner via email at elizabeth.werner@ncmail.net or phone (919) 508-8512.

Sincerely,

Edward F. Mussler
Permitting Branch Supervisor
