Re: New Buildings and Proposed Recycling Activities
Wilson County Landfill Facility, Wilson County, North Carolina
Permit No. 98-09, Document ID No. (Doc ID) 16741

Dear Mr. Davis:

On June 12, 2012 the Division of Waste Management (DWM), Solid Waste Section (SWS) received your letter dated June 5, 2012 and two sets of drawings – Facilities Map (Sheet 1 of 2) & Overall Map (Sheet 2 of 2). According to this letter (Doc ID 16740), the County has constructed a new maintenance shop and proposes to construct a Computer Equipment / Electronics and Single Stream Recycling Transfer Building at the Wilson County Landfill Facility, which will temporarily store electronic wastes and single stream wastes including aluminum/steel cans, glass/plastic bottles, and paper products. Computer equipment/ electronic wastes will be placed on pallets, and single stream wastes will be loaded to a tractor/trailer. It is estimated that approximately 2,500 tons per year of single stream wastes can be recycled at the landfill facility. The County plans to ship the collected computer/electronic recyclable to Creative Recycling in Morrisville, North Carolina on a weekly basis and to transport the single stream wastes to Sonoco Recycling in Raleigh, North Carolina once the trailer is filled up.

The SWS appreciates that the County provides updated information of the planned activities at the Wilson County Landfill Facility and suggests the County to conduct the following tasks when the County begins operating the above-mentioned recycling activities at the landfill facility:

- 1) Receiving and temporarily storing recyclable from the approved service area – the Wilson County which is consistent with the resolution passed by the Wilson County Commissioners on November 4, 2002.
- 2) Incorporating the updated information to the Facility Plan, Operations Plan, and as-built drawings in the next permit application document for Wilson County Westside C&DLF.

- 3) Maintaining the records of amount of the recyclable material and of contact information of the contracting recycling facility in the operating records. The quantity of the received recyclable must also be included in the annual facility report according to the requirement stated in the rules and the permit conditions.

If you have any questions of the suggestions, please contact Mr. Ben Barnes, the SWS Waste Management Specialist for your area at (919) 621-3680 or myself at (919) 707-8251.

Sincerely,

Ming-Tai Chao, P.E.
Environmental Engineer
Solid Waste Section
