Re: Air Permit No. 5896R2

Dear Mr. Clayton:

In the final design of the modified facility at Graham the refrigerated storage area was changed to an area of 60'x50'. Instead of stacking 18"x18"x24" cartons to a height of six (6) feet, they will be stacked to a height of twelve (12) feet or more. The ceiling height was adjusted to allow for the increased stacking. The same amount of waste (approximately 150,000 pounds) will be stored in the refrigerated area. This amount still represents 1.6 times the daily waste throughput when both incinerators are operating at capacity.

Sincerely,

A handwritten signature in cursive script that reads "Larry Parker".

Larry Parker
President
