RE: Use of beneficial fill at Alleghany County Transfer Station (permit # 03-03T)

Mr. Gaither,

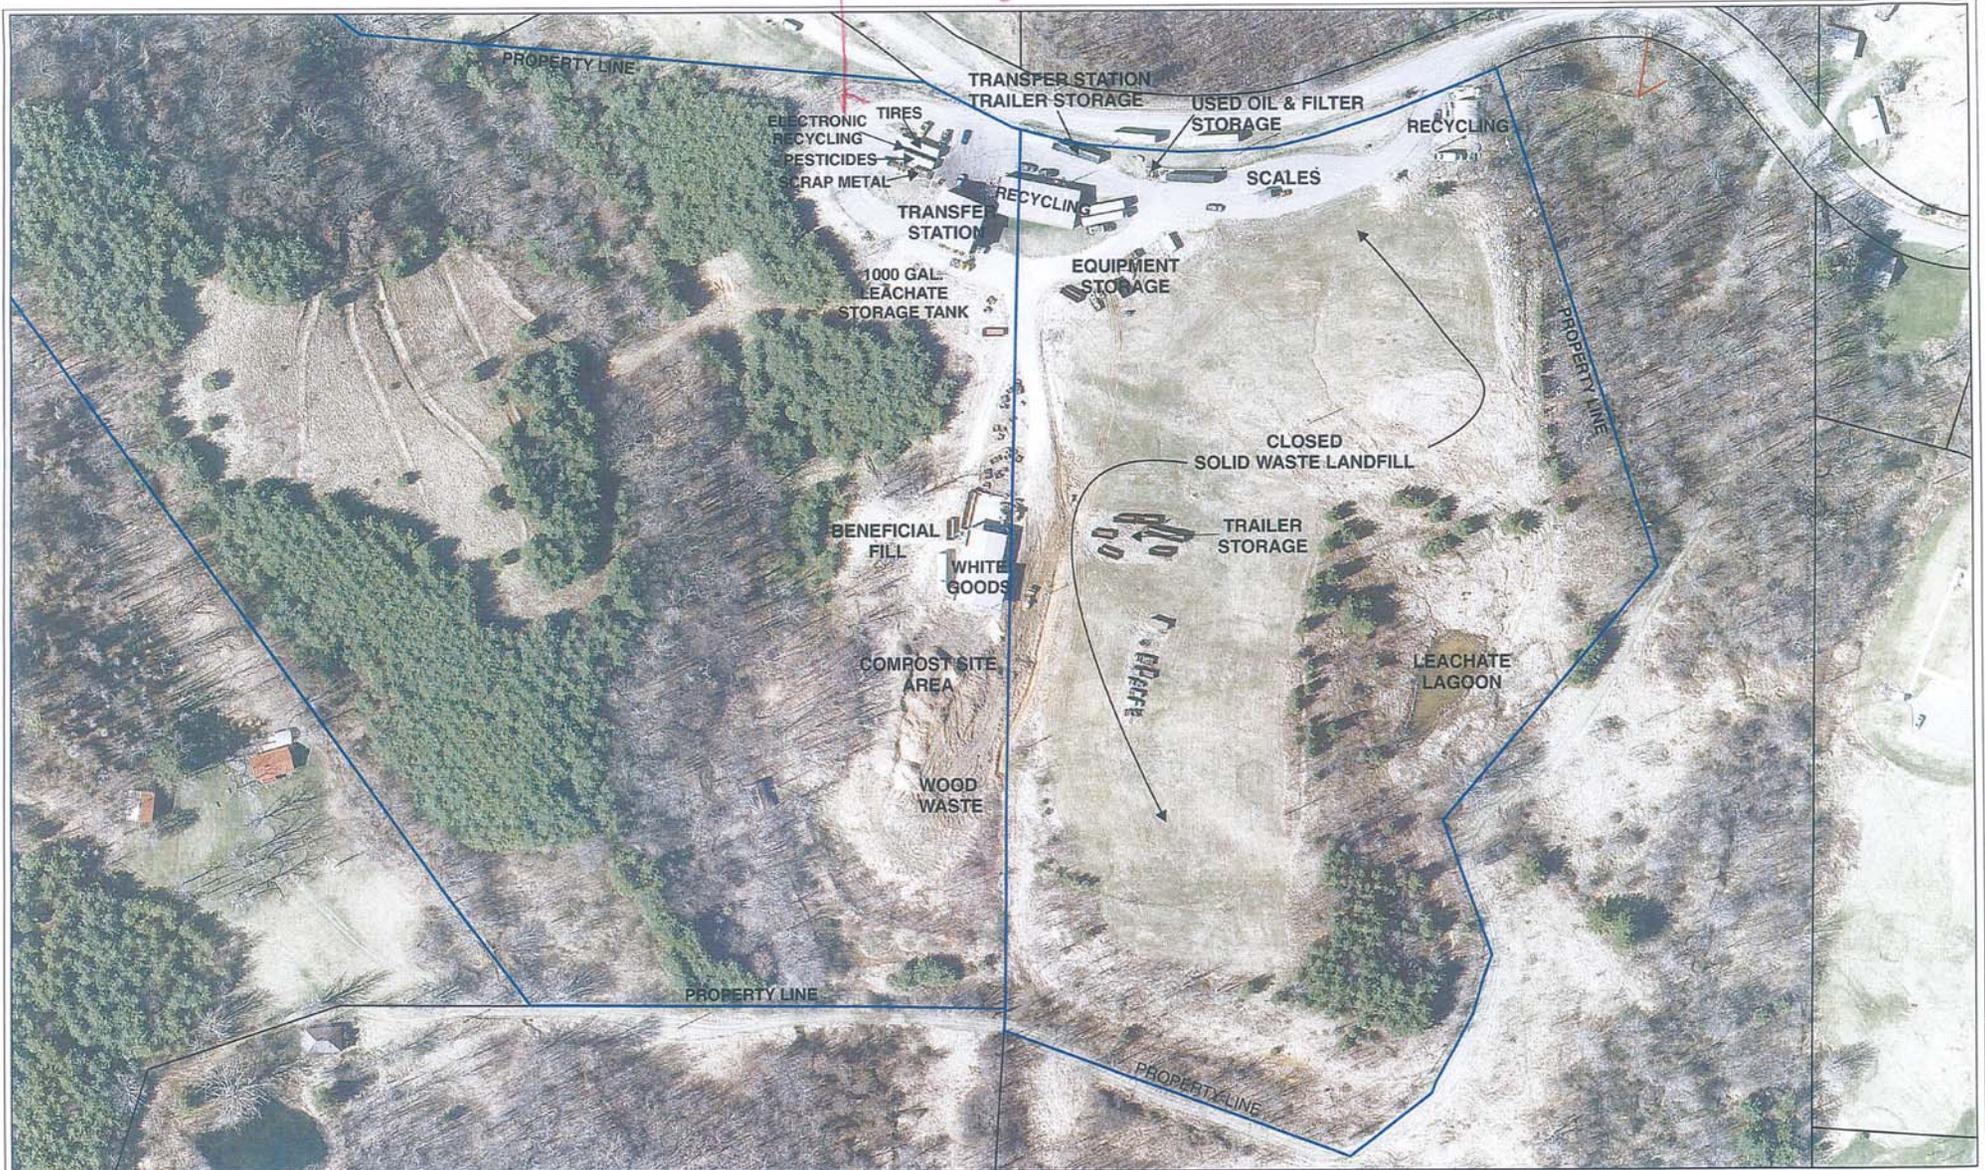

As you are aware from our discussions on the phone, Alleghany County is needing to widen the road that provides access to our tire trailer, electronic recycling trailer, pesticide recycling trailer and our scrap metal dumpster. The need to widen this road is due to the fact that it is extremely difficult to maneuver these trailers within the available space. Alleghany County desires to use beneficial fill material collected at our site to widen this access road. Attached to this letter is a copy of Alleghany County's Transfer Facility Site plan. I have hand drawn onto the site plan an approximate location of where the beneficial fill is needed. Alleghany County understands that all beneficial fill material accepted at our site must comply with rule 15A NCAC 13B .0562 consisting of only inert debris, strictly limited to concrete, brick, concrete block, uncontaminated soil, rock and gravel. It is our understanding that using beneficial fill to widen this road is an acceptable practice in accordance with NCDENR rules. Please confirm in writing that Alleghany County can indeed widen this access road with beneficial fill so long as the beneficial fill utilized complies with 15A NCAC 13B .0562. Please let me know if you need any further information.

Sincerely,

Don Adams

Alleghany County Manager

Area in need of beneficial fill in order to increase turning area for tractor trailers.
