585 Waughtown Street  
Winston-Salem, NC 27107

Attention: Mr. John Patrone

Reference: **Landfill Gas Monitoring Plan**  
Closed Caswell County Landfill – Permit No. 17-01  
Caswell County, North Carolina  
S&ME Project No. 1584-07-034

Dear Ms. Ritter:

Based on conversations with Kevin Howard, Caswell County, County Manager, we understand that during a 2012 inspection of the closed MSW landfill, Mr. John Patrone with the North Carolina Department of Environment and Natural Resources, Division of Waste Management, Solid Waste Section (NCDENR) reported to the County that it is required by regulation to conduct landfill gas monitoring, an activity not currently performed at the closed landfill. On behalf of the County of Caswell, S&ME Inc. (S&ME) submits this letter to inform NCDENR of Caswell County's plan to develop a Landfill Gas Monitoring Plan and conduct landfill gas monitoring to comply with applicable regulation.

Caswell County is currently in the process of obtaining County Commission approval to authorize these services. Authorization to proceed expected during early November. S&ME intends to provide the NCDENR with a Monitoring Plan for Landfill Gas within approximately 30 days of receipt of authorization to proceed from the County. We anticipate installation of gas monitoring wells within 30 – 60 days of NCDENR approval of the Monitoring Plan for Landfill Gas. Quarterly landfill gas monitoring will proceed following the installation of the gas monitoring wells.

Please do not hesitate to call our office at (336) 288-7180, if you have any questions or comments. We appreciate your assistance in the management of this project.

Sincerely,

**S&ME, Inc.**

Edmund Q.B. Henriques, L.G.  
Environmental Department Manager
